

# READY EXTENDED LIFE COOLANT (-40 °C)

SNF Type, Ready Extended Life

## Description

A long-lasting, ready-to-use coolant, formulated with organic additive technology (OAT), ensuring that the engine operates at the ideal operating temperature in any climate. Perfectly protects the cooling systems of all alloy engines of iron and aluminum against rust and corrosion. Does not contain nitrite, amine, phosphate, borate and silicate complying with environmental health regulations.

## Applications

It can be used during summer and winter as it prevents the radiator water from freezing in cold weather and boiling in hot weather inside aluminum and other types of radiators. It is ready to use and does not require additional water.

## Benefits

- Much more durable than conventional antifreezes.
- Protects the engine against cold and heat with its high thermal stability and heat transfer feature.
- Prevents the engine coolant from freezing in cold weather.
- Prevents the engine coolant from boiling in hot weather.
- Provides long-term protection against corrosion in alloy engines of iron and aluminum.
- It is consistent with all impermeability elements.
- Provides protection against foam formation.

## Typical Specifications\*

Color		Light Pink
Density, @ 15 °C, kg/m <sup>3</sup>	ASTM D-1122	1.07
pH, 100%	ASTM D-1287	8.55
Reserve alkalinity (pH 5.5)	ASTM D-1121	2.1
Freezing Point, °C	ASTM D-1177	-40
Boiling Point, °C	ASTM D-1120	109

\* Values shown may differ between productions.
